## Recommended

Waste %	0%	2%	10%	12%	15%	17%	20%
Area (m <sup>2</sup> )	1,783	1,819	1,961	1,997	2,051	2,086	2,140

Recommended waste is based on an asphalt shingle roof with a closed valley system (if applicable). Several other factors are involved in determining which waste percentage to use, including the complexity of the roof and individual roof application style. You will also need to calculate the post-waste quantity of other materials needed (hip and ridge caps, starter shingle, etc.).
